

**Investigations for Lymphomas**

<b>Haematology</b>	5ml EDTA	FBC & film (consider sample for flow cytometry in case of high WCC and no marrow available)	<input type="checkbox"/>
<b>Coagulation</b>	5ml citrate	PT, APTT, fibrinogen D dimers	<input type="checkbox"/> <input type="checkbox"/>
<b>Blood Bank</b>	5ml EDTA	Group & antibody screen	<input type="checkbox"/>
<b>Biochemistry</b>	5ml heparin	Urea, Creatinine, electrolytes & LFT's, LDH	<input type="checkbox"/>
		Bone profile: Calcium, phosphate, magnesium, urate, CRP	<input type="checkbox"/>
		Thyroid function tests	<input type="checkbox"/>
	5ml fluoride	Random glucose	<input type="checkbox"/>
<b>Immunology</b>	10ml clotted	Immunoglobulins & Beta-2 microglobulin Consider cryoglobulins	<input type="checkbox"/>
<b>Virology</b>	10ml clotted	CMV IgG	<input type="checkbox"/>
		Hepatitis B sAg and core antibody, Hepatitis C serology	<input type="checkbox"/>
		EBV (EBNa) & HSV & HZV & HIV serology Toxoplasma IgG	<input type="checkbox"/>
<b>Tissue typing*</b>	20ml EDTA	Patient Siblings	<input type="checkbox"/> <input type="checkbox"/>
<b>Other</b>		Chest X-Ray	<input type="checkbox"/>
		ECG	<input type="checkbox"/>
		Lumbar puncture	<input type="checkbox"/>
		CT / PET-CT staging	<input type="checkbox"/>
		Diagnostic excision LN Bx	
<b>Marrow *</b>		Morphology	<input type="checkbox"/>
		Flow cytometry	<input type="checkbox"/>
		Cytogenetics	<input type="checkbox"/>
		Trephine or clot histology	<input type="checkbox"/>

\* Send samples for trials as appropriate.
