

### Templates for auto text in Electronic Patient Records

These can be useful templates for use within clinic letters, they meet the requirements with regards to having a clear analgesia plan for patients and may help you track health maintenance.

#### Sickle Health Promotion:

Health maintenance	
Echo	
Bone health	
Ophthalmology	
Renal	
Iron management	
Hydroxycarbamide	
NIHR bioresource	

#### Non sickle health promotion

Health maintenance	
Echo	
Bone health	
Iron management	
Other	

Generic pain plan: please adapt to your individual patient requirements.

<b>Analgesia plan: Sickle cell acute pain crisis/Vaso-occlusive crisis</b>
<b>Home initial:</b> Paracetamol, 1 g, QDS and Ibuprofen, 400 mg, TDS
<b>Home escalation:</b> Codeine, 30-60 mg, QDS
<b>Acute presentation:</b> Entonox for 60 minutes. Morphine 10 mg S/C and repeat every 20 minutes until pain controlled. Then 5 mg SC 2 hourly PRN or oramorph 2 hourly PRN. <a href="https://nsg.oxford-haematology.org.uk/red-cell/documents/acute-management-sickle-cell-disease/S8-painful-crises-in-scd.pdf">https://nsg.oxford-haematology.org.uk/red-cell/documents/acute-management-sickle-cell-disease/S8-painful-crises-in-scd.pdf</a>
Additional information:

#### Vaccine history

Vaccinations	<ol style="list-style-type: none"> <li>1. Influenza (Yearly) -</li> <li>2. Hepatitis B -</li> <li>3. Hib (once in a lifetime) -</li> <li>4. Meningococcal -</li> <li>5. Pneumococcal (5 yearly)</li> <li>6. Covid -</li> </ol>
